

SL Cine Pan and Tilt Head

Built of anodized aluminum and stainless steel, the SL Cine Pan & Tilt Head withstands the rigors of underwater use but can also be used out of water in rain or splash situations. Position your camera with 360 degrees of pan and a tilt angle of 41° with adjustable drag and lock on both axes.

With the provided Ronford Baker style quick release receptacle and touch & go plate the HydroFlex RemoteAquaCam housings or splashbags can be popped on or off quickly and easily. It can be mounted to any Mitchell style tripod, riser or high hat.
