

EZ Series

by Angénieux

With the EZ series, your dream lens is within reach.

Your dream lens within reach.

Originally designed for independent filmmakers and productions (short films, documentaries, music videos, corporate and more). Angénieux EZ zooms have enjoyed success with cine rental houses and professional cinematographers worldwide.

Thanks to their S35/FF modularity and flexibility, EZ zooms are the preferred lens choice for all levels of filmmaking.

Using Angénieux's innovative IRO (Interchangeable Rear Optics) Technology[®], versatile, future-proof Angénieux EZ zooms work with multiple camera formats. The EZ series features dedicated rear optical groups customized for both S35 and Full Frame sensors, and provide interchangeable PL, RF, EF & E mounts compatibility on demand.

Cine-Style & ENG Type Applications

EZ lenses are designed for full manual operation, with sufficient rotation angles for creative and precise focus, zoom and iris control. The lens mechanics is made with high-quality, lightweight metal for precision and durability, including temperature compensation to avoid recalibration.

EZ Zooms provide incredibly fast T-stops, large format sensor coverage, and thanks to their industry-standard 0.8 gear teeth on all three rings, are compatible with lens motors and follow focus units for Cine Style acquisition. The 114mm front diameter is matte box compatible, a Hood is also available.

For ENG shooting, a broadcast servo unit (MSU), was designed specifically for EZ Zooms, and is compatible with a wide variety of hand controllers for remote lens control.

Fast aperture & up to FF

EZ lenses are available as a S35 & FF/VV package, and are among the fastest aperture in the industry for S35 cameras. They cover an image circle up to 30mm diagonal for cameras recording in HDTV/UHD modes and APS-C format DSLRs. The large format option makes the lenses cover an image circle up to 46mm diagonal, thanks to the innovative IRO Technology[®].

The lenses perfectly match Full-Frame sensors by RED, ARRI, SONY and other cameras with larger image circles. In S35 cameras, the large format rear group also functions as a 1.5x extender.

No crop factors

The 22mm/T3 wide-angle end for large format cameras converts the lens into a 15mm/T2.0 for S35 cameras, maintaining a similar field of view with extra gain in T-stop.

Innovative modular design that allows users to optimize lenses for different image circle sizes.

THE NEW EZ-3 LENS

The EZ-3 lens is the new Tele-lens addition to the versatile, future proof Angénieux EZ series. Based on the same philosophy as EZ-1 and EZ-2, the EZ-3 is a compact and affordable cinestyle zoom lens. It also includes improvements such as a quick IRO Technology[®] mechanism and dual focus scales (feet-meters).

The new Tele zoom 45 - 165 mm T2.3/T3 S35 and 68 - 250 mm T3.5/T4.5 FF works with multiple camera formats, thanks to its easy interchangeable mount system (PL, RF, EF, E).

Focus ring
TUTORIAL

- ◆ Compact and affordable cinestyle tele zoom
- ◆ Based on the same philosophy as EZ-1 & EZ-2

NEW ◆ New quick IRO Technology® mechanism

S35 & FF user configurable

- ◆ Compact & lightweight :

2.6 kg | 4,40 lb

Lens Length 265 mm | 10.4 "

- ◆ Fully compatible with EZ-1 & EZ-2 accessories :

User configurable mounts : PL, EF, RF, E

Same FTZ gear position, MSU-1 & MSU-1A compatible

114mm front diameter with 105mm filter thread

- ◆ Long tele reach :

S35 45 - 165mm T2.3/T3 | Constant T-Stop 45 - 135 mm T2.3

Constant T-stop across the entire zoom range when iris is set to T3 or slower T-stop

FF 68 - 250mm T3.5/T4.5 | Constant T-Stop 68 - 200mm T3.5

Constant T-stop across the entire zoom range when iris is set to T4.5 or slower T-stop

NEW

- ◆ Dual foot-meter scale focus ring

Easy feet-meter conversion with standard screwdriver and no collimator

EZ-3 Quick Change

FF ↔ S35

Advanced IRO Technology[®], faster conversion between FF & S35 :

Swap rear optical blocks with a twist of the ring

Change T-stop and focal length markings by sliding window

No need to remove lens mount, PL mount supplied to both FF & S35 rear blocks

No rings to exchange

Quick change in only 5 minutes !

IRO Interchangeable
Rear
Optics
Technology[®]

1. EZ Change of the image format coverage by unlocking the red nut, going from FF to S35. Swap the rear and relock.

2. Unscrew the 4 screws and rotate the iris index ring by 180°.

3. Lift up the rubberband, unscrew the 3 screws maintaining the ring and slide it.

4. Rethread the ring, put on the rubberband.

You are done
